EDUCATION

Universidad Autonoma de Baja California **Aug 2022 – Present**
B.S. in Software and Emerging Technologies Engineering *Ensenada, BC*

***Relevant Coursework**: Data Structures, Algorithm Analysis, Databases, Computer Networks, Software Analysis & Design, Cloud Computing*

EXPERIENCE

UABC Systems Development Department **Feb 2026 – Jul 2026**
Software Engineering Intern *Ensenada, BC*

- Maintained and optimized backend modules for internal university systems, boosting reliability and performance by 45%.
- Designed and built a new internal university system module using Java Spring Boot, delivering core functionality of enabling students to submit bug reports across 20+ university systems.
- Led early-stage requirement analysis across stakeholder interviews, shaping the scope of 3 university system enhancements over 8 sprints.

CleanMindset Cleaning Services **Aug 2025 – Jan 2026**
Fullstack Developer *Alexandria, VA – Remote*

- Owned end-to-end SDLC for new features, translating stakeholder interviews into developed, tested, and validated releases, delivering 6-10 features per sprint.
- Architected a full-stack booking platform, replacing a phone-only booking process with a self-service app supporting dynamic pricing and real-time availability, driving 70% of new bookings through self-service within 2 months of launch.
- Built an admin dashboard with bulk actions and status automation, reducing manual scheduling by $\tilde{2}5$ hrs/week.
- Implemented CI/CD pipelines with GitHub Actions to automate testing, reducing manual QA effort and catching issues earlier.

PROJECTS

Clean Mindset Web Application | *NextJS, React, PostgreSQL, Stripe, Nodemailer* **Sep 2025 – Dec 2025**

- Developed a customer review system with appointment-based validation and content moderation, increasing published testimonials while maintaining zero inappropriate content incidents.
- Designed a slot-based appointment flow with an instant estimate wizard and secure in-page Stripe payments.
- Built a token-based appointment tracking system with expiration handling and Stripe payment integration.

PcBuilder+ | *Java 17, Spring Boot 3, Spring Data JPA, PostgreSQL, Maven* **Oct 2025 – Dec 2025**

- Built a layered RESTful backend (Controller/Service/Repository) with DTO mapping and centralized exception handling.
- Implemented 40+ REST endpoints with paginated search and filtering, optimizing queries to reduce payload and avoid N+1 patterns.
- Developed a compatibility/recommendation engine with async build analysis via a configured thread pool.

Tastify | *NextJS, Tailwind, Cloudinary, Clerk* **Jan 2025 – Jun 2025**

- Built a culinary learning app with a gamification system (points, streaks, leaderboard and badges) to drive engagement.
- Integrated premium subscriptions with webhook-based state sync and a self-service billing portal.

TECHNICAL SKILLS

Languages:	Java, Typescript, Javascript, Python
Frontend:	React, React Native, NextJS, TailwindCSS, HTML, CSS, UI/UX
Backend:	REST APIs, Spring Boot, NextJS API Routes, Node.js, FastAPI, SQL
Database:	PostgreSQL, MSSQL Server, ORMs (Drizzle, Prisma), Supabase, Neon
Cloud:	Amazon Web Services, Azure, Google Cloud Platform
DevOps:	Docker, CI/CD (GitHub Actions), Bash Scripting, Git/GitHub, Ubuntu Server
Testing & Tools:	Postman, Jira, Trello, Playwright, Selenium
AI & Agents:	Skills, MCPs, Spec-Driven Development, OpenCode, Cursor, Codex, Claude Code, Gemini API
